Welding System

HUAHENG WELDING CO., LTD.

Bend Pipe-Flange Automatic Welding System

- Both inside and outside two seams welding simultaneously, which minimize labor intensity and skills
- Open designed headstock which is convenient for load/unload work piece
- High efficiency, e.g $\Phi 155\text{mm}$ pipe welding time less than 60s for two seams at the same time
- Unique welding process for two seams
- Patent design open headstock rotator with AC servo motor for stable rotation and high accurate control
- Suitable for variable OD bend pipe-flange inside and outside seams welding simultaneously
